- David Stroncek, MD – *National Institutes of Health*

Society for Immunotherapy of Cancer Presents

CANCER IMMUNOTHERAPY CLINICAL TRIALS: CONCEPTS AND CHALLENGES

April 4-5, 2013 • 8:00 AM to 5:00 PM
NIH Campus, Masur Auditorium, Building 10
Bethesda, MD

The key questions that will be addressed include:

- What are the current challenges for the development of immune therapy and vaccines?
- What preclinical data is required for clinical development?
- What early phase clinical trials are needed for clinical development?
- What clinical trials strategies hasten the development of combination immunotherapy?
- How can we make the development of immune therapy agents more economically feasible?

Society for Immunotherapy of Cancer

Call for Abstracts!

SITC invites you to submit an abstract by **February 28** based on the problems and solutions identified in the following areas:

- Early Vaccine Clinical Trial Development
- Early Immunomodulator Therapy Clinical Trial Development
- Immune Therapy In Combination
